***Allowable Subject Matter***

1. Claims 1-38 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest an axle assembly having a tubular body with radially deformable ends that are radially deformed by the axial displacement of first and ends expander elements located at respective ends of the tubular body, the axial displacement of the expander elements caused by pivotal actuation of a lever.

The Shinichi and Zoor combination lacks reference to two expander elements that are both axially displaced due to actuation of a lever actuator.
